

## Multi-Course Resort Selects the Total e Golf Software Platform

*Osprey Valley Golf Resort is the newest addition to the Total e Golf community*

Toronto, Ontario – Thursday, December 10th, 2009 - Total e Golf is pleased to announce that Osprey Valley Golf Resort is using its full suite of integrated golf management software tools.

Osprey Valley Golf Resort is a 54 hole facility offering golfers 3 magnificent tests of golf. The Hoot and Toot golf courses are described as “Wasteland and Parkland” courses that offer generous fairways, huge waste bunkers and challenging greens along with superior conditions that will not disappoint even the most avid golfer. The Heathlands Course is considered their strongest test and is regularly ranked inside the top 10 public courses in Ontario.

Integration and providing insight into operational activity were the key factors the owners required in a new software platform for Osprey Valley. With head office at a separate location, the owners were looking to ensure they were up to speed with real time numbers and information at all the golf courses.

Dave Spylo, Director of Golf Operations at Total e Golf says “The owners of Osprey Valley were looking for a solution with a solid foundation that they could build upon. Purchasing a new technology platform was an important factor for them as they were looking to invest in a solution that would have a very long life span by being able to adapt over many years. We ensured them that Total e Golf would be the last system they would ever need to purchase.”

“Osprey is widely considered the best multi course facility in the province if not the country, and we are extremely excited to add them to our growing list of customers. We have had a great deal of success with multi course operators and I believe that working with Osprey Valley affirms our belief that Total e Golf is a great partner for any multi course operation to consider. With more information and better tools for their staff and management, I believe Osprey Valley will only become more successful with time.” says Mike Flannagan, President of Total e Golf.

About Total e Golf:

Total e Golf is a fully-integrated software suite that gives golf course operators the ability to manage their operations to their total potential. Total e Golf delivers comprehensive business management solutions for numerous golf facilities including Wooden Sticks, Cardinal Golf, Golf North, Wooden Sticks and John Daly’s Thundering Waters.
